Duration data sheet

Write the time each episode starts and stops. Add the episodes up at the end of the observation.

Learner / student _____ Observer _____ Date _____

Observation start _____ Observation end _____ Total minutes observed _____

Behavior and definition (when an episode starts, when it ends): _____

#	Start time	Stop time	Duration (min:sec)	Notes
1				
2				
3

12				
13				
14				
15				

Number of episodes		**Total duration**	
Average duration per episode		**Percent of observation**	

Average duration = total duration ÷ number of episodes. **Percent of observation** = total duration ÷ length of the observation × 100. Example: 3 episodes adding up to 6 minutes in a 30-minute observation is an average of 2 minutes and 20% of the observation.
